Many persons have contributed to the full content, development and preparation of this FIG Age Group Program. The project was initiated and encouraged by FIG President, Prof. Bruno GRANDI to serve as an effective program for the safe and healthy long term development of gymnasts.

The development and implementation of this FIG Age Group Program is partially funded by the International Olympic Committee (IOC).

The overall preparation, design, formatting and editing of this FIG AGE GROUP DEVELOPMENT AND COMPETITION PROGRAM book was done by:

Hardy FINK, Director of FIG Education & Academy Programs.

Message from FIG President Prof. Bruno GRANDI

Dear Friends,

Since the day I took office at the head of the FIG, I have consistently given precedence to the physical and psychological well-being of both amateur and elite gymnasts.

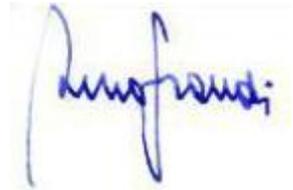

Today, my message remains unchanged. It is concise, coherent and unifying; and it hinges on two basic axes: Gymnastic Academies and Age Groups.

I have, by means of the Academies, restored and consolidated the technical and cultural level of our educators and coaches. Through the Age Groups, our young gymnasts have been shielded from the harmful influence of individuals more concerned with their own careers than the health of the gymnasts with whom they have been entrusted.

I am grateful to those who have invested in these tremendous activities, and would invite our educators to be inspired by the technical and cultural content they provide.

Gymnastics is most beautiful when expressed through an age-appropriate technical gesture and embellished by body expression.

With my compliments,

FEDERATION INTERNATIONALE DE GYMNASTIQUE

Prof. Bruno GRANDI, *President*

Message from Director of Education & Academy Programs - Hardy Fink

I am pleased to be able to present this FIG Age Group Development and Competition Program in final form for worldwide access and distribution via the FIG Website.

With the partial support of the IOC, this program was developed and then introduced at numerous coach and expert training sessions all over the world. Because of the experiences and learning and input and consultation from these training sessions, the MAG and WAG Age Group Programs have had more world-wide consultation and testing over a five year period than any other initiative in FIG history. In consequence, these age group manuals have gone through five editions as the recommendations have been adopted and improvements have been made.

All aspects of the programs – Technical Manuals, videos of every physical and technical test and of the compulsory exercises as well as the WAG floor exercise music - will be posted or be accessible from the FIG website (under Education) as of June 2015. Enormous gratitude is extended to Lilia Ortiz López and Derick Scholtz who spent months to prepare each of the nearly 400 videos with their gymnasts.

The entire program is intended to serve as an athlete centered “recipe” for non-experts and for federations that do not have the expertise or resources to develop their own programs. It is intended to safely and systematically prepare gymnasts towards high performance below the junior level. Our gymnastics sports have evolved in the past 40 or 50 years from being adult based to ones where intensive childhood training has become the norm. It is the adults that tell the children what to do and how much to do and too often the health and safety and care of the children is ignored. The FIG Age Group Program focuses on quality of performance and health of children before difficulty. Higher difficulty can be trained at younger ages under safe conditions, but should not be included in competition exercises.

There is no intention that federations must adopt any portion of this FIG Age Group Program. But it will be an enormously valuable resource and “recipe” for those that have no program of their own. As for the competition portion of the program, it is the first time that there is a common set of age group competition rules available worldwide and this has the potential to provide a variety of advantages and opportunities.

Accordingly, I am pleased to be able to make this announcement:

- **The High Performance Levels 3 & 4 (HP3 and HP4) competition rules are highly recommended for all international age group competitions.**
- **For those competitions that require FIG approval, the HP3 and HP4 rules will soon be required.**
- **Because HP4 overlaps with the FIG Junior ages, no gymnast may compete as a Junior and as an Age Group gymnast in the same year.**

Many countries will continue to use their own competition rules designed for their own programs within their countries, but will gradually begin to compete with the FIG age group rules when they compete internationally with other countries regardless of level.

Good luck to your coaches and your gymnasts for a safe and successful future.

PHILOSOPHY and OVERVIEW

FIG Age Group Program Overview & Philosophy

The rapid increase in the difficulty content of gymnastics performances has been the result of ever increasing volume and intensity of training at ever younger ages. At the same time, coaches in leading countries have become more effective in the technical preparation of gymnasts which causes many less successful coaches and programs to try to copy by taking short-cuts towards difficulty.

This increase in training hours and decrease in training age of children for high intensity training has placed our sport under ever more scrutiny and criticism by the medical, educational and media professions who often use gymnastics as an example of abusive and excessive training practices.

It is important for all in the sport to assure that these negative impressions are proven wrong. Too often these impressions are right. The FIG is working vigorously in this regard with changes to rules that have negative consequences and with the education of coaches to improve their knowledge and their effectiveness without causing harm to the gymnasts under their care.

This FIG Age Group Development and Competition Program is an effort to provide “ready-to-use” physical preparation, technical preparation, and competition programs for countries with little experience with contemporary international gymnastics and for the many countries that do not have the resources to develop a program of their own.

- The focus is on the safe and perfect long term preparation and development of gymnasts towards high performance.
- This program provides information to assure gradual and safe progressions.
- This program provides programs that can be recommended for all coaches and all federations.

More detailed information on the theory, technique and methodology for the teaching of all elements presented in this document is available through the three-level FIG Academy Program.

Information about the Growing Child in Gymnastics

This FIG Age Group Development and Competition Program is connected with the educational efforts of the FIG Academy Program. The FIG Academy Program has focused on the safe and healthy preparation and development of young gymnasts towards high performance excellence. The foundation for this focus comes from the Growth & Development document on the FIG Age Group Program Resource CD distributed by the FIG to all federations in 2001 and again in 2003. Some observations from this important document are presented here.

Paramount for a coach’s understanding is that the age period of 11-15 is a critical time for our gymnasts because it is a time when they are capable of learning complex aerial skills quickly but are simultaneously susceptible to debilitating acute, chronic and overuse physical injuries and to emotional and psychological damage.

- Gymnasts in that age period have open growth plates (cartilage instead of bone) at the end of every long bone in the body as well as wherever a tendon attaches to a bone. These growth plates are susceptible to injury from torsion and shear forces and excessive or repetitive compression forces.
 - Adequate recovery time must be provided
 - Numbers of high impact loadings must be reduced
 - Incomplete twists and saltos cannot be permitted
 - Soft landing surfaces should be used
- Gymnasts in that age period will undergo a period of rapid growth (peak-height velocity - PHV).
 - All parts of the body and body systems grow at different rates and this may lead to clumsiness and loss of some skills.
 - They will be less flexible as the bones grow and put the muscles and tendons under stretch.
- Gymnasts in that age period will undergo a period of rapid weight gain soon after PHV (peak-weight velocity – PWV).
 - They will gain weight faster than strength and thus will temporarily lose relative strength.
 - They should not be put on a restrictive diet; they must eat optimally for optimal and healthy growth.
- Gymnasts in that age period do not have mature anaerobic-lactic systems; yet the sport of gymnastics is predominantly anaerobic.
- Successful gymnasts are almost always late maturers.
 - Late maturation and smaller size at that age may lead to feelings of inferiority and low self-esteem.
 - Their growth plates are open and susceptible to injury longer.
 - Gymnasts in that age period should focus mostly on learning and less on competition. International competitions can be introduced but the focus must be important base elements perfectly performed and rules such as presented within this document should be used that modify the difficulty expectations.

OVERVIEW OF LONG TERM PERFORMANCE DEVELOPMENT OF GYMNASTS

Long Term Performance Development of Gymnasts

For the preservation and a lasting acceptance of our sport, a systematic long term preparation of gymnasts is required, that takes into consideration the growth and maturational principles.

To deviate from such preparation system by striving for early specialisation or early high difficulty elements, does not serve the gymnasts and contributes to un-aesthetic performances, injury and a rejection of our sport by the public. Coaches who, for whatever reasons, practise such behaviour, can occasionally achieve good results but in the long run such an approach will not be successful and will lead to severe attrition.

During long term performance development, the load ability in general and the load ability of the support and motor system in particular, have a central position. During his previous and current activity as a coach, Dieter Hofmann has made positive experiences with a common point of view towards the systematic performance development of athletes with coaches, physicians, gymnasts and their caretakers.

This common effort should be concentrated on essential aspects:

- A systematic increase of the loads with the purpose to create a long term and lasting load ability of the support and motor system.
- A high development of the prerequisites (flexibility, power, basic structures) to limit the negative load effects of high repetitions of movement and faulty techniques (inefficient position of the joints);
- To promote and encourage the education of all-around gymnasts in order to guarantee the balance of the loads (dismount, support, hang);
- The systematic and gradual use of the "phase of favourable motor learning" in the long term performance development;
- To coordinate with the high responsibility of the personified chain: gymnast – trainer – physician – physiotherapist;
- To guarantee a safe and continuous proportionality of training, competitions and phases of compensation;
- Extensive use of methodical equipment (auxiliary equipment) in the training process and to pay high attention to this matter in the construction of training halls.

«Training halls are education centres, not competition halls»

This philosophy of gymnastics has once again touched out sport:

«Gymnastics is complicated, not because it must be difficult, but because it has to be beautiful »

The authors of this programme are confident that trainers and athletes will accept this assistance and will find a well-founded support in this document.

Summary of information about Long Term Performance Development

- The completion of the tasks in the individual stages and the mental and physical readiness are the criteria for a next higher level.
- The age-related tasks should be considered from the biological development and not from the chronological age.
- The goal of the **Basic Training** is to develop fundamental and sports-specific prerequisites; especially movement regulating and neuromuscular prerequisites.
- The goal of **Preparatory Training** is to increase the level of the general and specific prerequisites (coordination, technique, speed, flexibility, power, etc.) and the increase in load ability.
- The goal of the **Advanced Training** is to develop a systematic transfer from the age group training to the high performance training. It is about securing the connection with the international level through a systematic increase of the specific training demands.
- **Preparatory Training** basically differs from **High Performance Training**
 - It has a specific character. The performance prerequisites for the further sports development are being developed and the prerequisites for the further increase of the training demands and load ability are created.
- The goal of Long Term Performance Planning is
 - to create prerequisites (flexibility, power, basic technical structures), that are necessary for a stable and continuous increase of the specific performance

It is not the competition goals, but rather the educational goals for technical and physical abilities that are in the highest priority.

Introduction

This Men's Competition Program was designed to provide competition opportunities for gymnasts of all ages and all levels. Boys and men participate in gymnastics for many different reasons, all equally valid and welcome.

It is complicated with a single set of rules to serve both the needs of the recreational gymnast who wants to compete occasionally to remain motivated and to test himself against others and the needs of the high performance gymnast who wishes to represent his country on the international stage. Moreover, some gymnasts might begin training in early childhood while others have no opportunities or exposure until they are in their teens. It is important to somehow keep all of these gymnasts by providing meaningful participation and success opportunities for them.

This program divides the competitive participants and opportunities into two streams; a Participation Stream and a High Performance Stream. The Participation Stream has four Competition Classes each divided into multiple age groupings that permit early or late starters to participate successfully. The first two Competition Classes prescribe compulsory exercises that are also appropriate for the High Performance Stream but only at specified and restricted ages.

The High Performance Stream is divided into seven progressive Competition Classes. Class HP1 and HP2 are the same as for the Participation Stream. Then the High Performance Stream becomes more difficult with the last two Competition Classes being Junior Level (using FIG Junior rules but not FIG Junior ages) and Senior Level. The first five of the seven Competition Classes for the High Performance Stream include compulsory exercises. Experience has shown that compulsory exercises serve to direct the training towards high performance and serve additionally as a form of education for and control over coaches.

Note:

- The multiple ages in the Participation Levels allow for late entry into gymnastics and longer years of participation. That number of age groups may be too many for federations with low participation numbers. Different age groups can compete together and be separated for awards.
- Class 1 and Class 2 compulsory exercises should form the very basis of any competition gymnastics and should therefore be the same for the Participation and the High Performance Streams. Some federations may choose to make more simple compulsory exercises for the Participation Levels or to eliminate the most challenging skills.
- Some categories overlap with current FIG Junior ages (Classes HP4 and HP5). This program permits gymnasts of those ages to compete meaningfully without having to jump to FIG Junior-level rules and requirements before they are ready. The Junior level in this document uses FIG Junior rules but recommends an option for federations whereby the age is extended to avoid being forced to the Senior level before the gymnast is ready.

An overview of the competition structure and program is presented below:

FIG Age Group Program - Men's Competition Structure and Program

Note: In the interests of development, there is no Junior designation with FIG ages (FIG age 14-17) for this Competition Program. See note above.

General Regulations

Article 1 Competition Ages

- a. The gymnasts' age eligibility will be based on his age on December 31 of the year of competition.
- b. It is recommended that gymnasts under age 8 do not participate in formal competitions.
- c. A gymnast who is below the minimum age for his Competition Class may participate in this category with approval of the appropriate technical committee. Such permission should be confirmed before the registration deadline for the competition.

Article 2 Warm-up, Spotting and Assistance

- a. It is recommended that Competition Classes P1-P4 and HP1-HP5 be provided with 90-minues of general warm-up prior to the competition but no one-touch (or 30-second) warm-up in advance of the competition.
- b. A spotter is required at horizontal bar for all Competition Classes. The Chair of the Apparatus Jury will not permit the performance to begin until a spotter is present. A deduction of 0.3 will be taken off the final score for that apparatus if the coach leaves during the performance of the routine.
- c. Soft safety mats (5, 10 or 20 cm) are permitted without penalty on all apparatus except Floor Exercise and Pommel Horse; however, normal landing deductions will apply. The use of a safety mat on Floor Exercise or Pommel Horse will result in a 0.30 deduction from the Final Score.
- d. A safety collar must be used for all round-off entry vaults. The Chair of the Apparatus Jury will not permit the performance to begin until a safety collar is present. Failure to use the safety collar will result in a Final Score of 0-points for that vault. A hand-support mat placed in front of the vault board should be available.
- e. The use of any non-permitted supplementary equipment will be deducted 0.3.

Article 3 General Judging Rules

- a. For all Competition Classes of National competition, each member of the judging panel will be responsible for both D-jury and E-jury tasks unless 4 or more judges are assigned to the event.
- b. Unless otherwise stated within this document, execution errors for poor technique, poor body position, and permitted elements, etc. are evaluated according to the Junior Rules of the current FIG Code of Points.
- c. Deductions of a disciplinary nature are taken from the Final Score by the Chair of the Apparatus Jury.

Specific Regulations

Article 4 Specific Judging Rules

The evaluation of optional exercises in Competition Classes P3-P4 & HP3-HP5 (Junior and Senior already follow the FIG Code) will be based on the additive system of the current FIG Code of Points. There are 2 evaluation factors in this system; a Difficulty Score (D-score) and an Execution Score (E-score)

D-score

The D-score is calculated based on adding the following 3 aspects of a performance;

- i. The values of the difficulties presented in the exercise up to a specified maximum number.
- ii. For Competition Classes P3-P4 and HP3-HP5, 0.3 for each Element Group Requirement which was fulfilled in the exercise.
- iii. The values of any eligible Bonus Connection points that were performed.

The D-score is calculated according to the following sequence:

1. Determine the value of the dismount. If a gymnast does not perform a recognized dismount he will automatically be penalized by not receiving the 0.3 for that Element Group requirement.
2. Determine if the remaining Element Group requirements have been performed and award 0.3 for each one met (Plus the value of the element itself). This applies also to A-part and B-part dismounts.
3. Add the value of the remaining most difficult recognized elements up to the maximum number of elements permitted.
4. Add any Connection Bonus that applies (Floor Exercise and Horizontal Bar only).

E-score

The E-score deductions for Optional Exercises and, when not specified, for Compulsory Exercises are as follows:

Class P 1, 2, 3, 4 & HP 1, 2

Small error	= 0.10
Medium error	= 0.20
Large error	= 0.30
Fall	= 0.50

Class HP 3, 4, 5

Small error	= 0.10
Medium error	= 0.30
Large error	= 0.50
Fall	= 1.00

Final Score

The Final Score for Compulsory and for Optional Exercises is determined by adding the D-score and E-score and this score is then displayed to the public. If possible, the D-score, E-score and Final Score should be displayed.

Additional information

- i. For optional exercises in Competition Classes P3 and P4, any legitimate gymnastics element that is not recognized in the current FIG Code of Points will be given an A-value regardless of any previous Code value. Examples include: shoulder stands, rolls, hip circles, etc.
- ii. Non-value parts are neither credited nor deducted provided they are performed without execution errors.
- iii. Unless otherwise indicated, a layaway will be deducted as per FIG for Competition Classes HP3-HP5. In Competition Classes P3 and P4, these will be permitted without deduction.
- iv. For all Competition Classes, in case of a poor Vault, the gymnast may choose to vault again with an automatic deduction of 1.0 points. This deduction is applied by the Chief of the Apparatus Jury and is deducted from the Final Score.
- v. The FIG atypical straddle regulation will not be applied for Competition Classes P3-P4 and HP3-HP4. A strength element performed with straddle will normally be valued at 1 value below the FIG unless otherwise indicated.

Article 5 Additional Modifications to the FIG Code of Points for Competition Classes P3-P4 and HP3-HP5

a. Developmental Parts

Competition Classes P3-P4 & HP3-HP5 may make use of specially designated developmental parts; parts whose value differs from those listed in the current FIG Code of Points or are not recognized within that Code. Gymnasts of Competition Classes P3-P4 and HP3 may use the identified elements to meet Difficulty requirements, Element Group requirements and possible Connection Bonus points.

b. Repetition

Competition Classes P3, P4 & HP3, HP4, HP5 may repeat one element of sufficient difficulty as follows:

- | | |
|-----------|--|
| Class P3 | – may repeat one skill of A or B value |
| Class P4 | – may repeat one skill of B or C value |
| Class HP3 | – may repeat one skill of B or C value |
| Class HP4 | – may repeat one skill of C value |
| Class HP5 | – may repeat one skill of D value |

d. Compulsory Exercises

- i. Compulsory exercises are evaluated by a single jury of judges rather than separated Difficulty and Execution Juries.
- ii. Compulsory exercises have a maximum Final Score of 10. Execution deductions are taken from the value of the content performed.
- iii. During the performance of any Compulsory Exercise, a gymnast may repeat an element for value following a fall or stop.
- iv. The omission of an element will result in the loss of value of that element.
- v. The addition of an element will result in the deduction of 0.5 from the Final score.

Article 6 Element Values & Maximum Number of Elements

The chart below indicates the maximum number of difficulty parts that may be counted towards the D-score in each Competition Class and the value of those parts. It also indicates which parts may not be performed in a given Competition Class.

Element Values & Maximum Number of Value Parts in D-score (including dismount)

Competition Class	Maximum # Elements	A-part value	B-part value	C-part value	D-part value	E-part value	F or G-part value
Class P3	6	0.1	0.2	0.3	0.4 Permitted on PH only	Not permitted	Not permitted
Class P4	7	0.1	0.2	0.3	0.4 Permitted on PH only	Not permitted	Not permitted
Class HP3	8	0.1	0.2	0.3	0.4 Permitted on PH only	Not permitted	Not permitted
Class HP4	8	0.1	0.2	0.3	0.4	0.5 Permitted on PH only	Not permitted
Class HP5	8	0.1	0.2	0.3	0.4	0.5	0.6 Permitted on PH only

Article 7 Short Exercises

The following chart indicates how the E-jury must evaluate short exercises in each Competition Class. An element with a large error may count towards the total number of elements required even if not recognized for value or element group requirements.

Evaluation of Short Exercises (maximum E-score)

Competition Class	8 elements	7 elements	6 elements	5 elements	4 elements	3 elements	2 elements	1 element
Class P3	10.0	10.0	10.0	8.0	6.0	4.0	2.0	1.0
Class P4	10.0	10.0	8.0	6.0	4.0	3.0	2.0	1.0
Class HP3	10.0	8.0	6.0	5.0	4.0	3.0	2.0	1.0

Purpose of the Physical Ability Development and Testing Program (PAT) – (Physical ability testing)

- The PAT shows what the demands are for the development of the flexibility and power skills.
- The selection of test exercises is based on experiences over many years and is an extract from training programs for the development of the physical ability prerequisites for performance.
- The test exercises for flexibility are focused of the level of development of the passive and active flexibility of the hips and shoulders.
- The test exercise of the power skills are based on the determination of the level of development of the explosive power, the special power endurance, and the level at static and dynamic components of exercises.
- Current knowledge about the level of education in many countries shows that the development of the performance prerequisites of flexibility and power should have more attention.
- Based on their capability, gymnasts have the possibility to obtain a score of 1.0 to 10.0 points per test exercise. Such control procedures offer the possibility to compare one’s personal score with the best score for each test component.

Effective Physical Ability Training

Coaches are reminded to review the basic principles of tissue adaptation for strength, flexibility, power and endurance training as presented in the FIG Academy Programs. All tissues (muscle, tendon, ligament, bone, cartilage, skin) and body systems adapt to an imposed stress during the rest or recovery period. Gymnasts must be prepared gradually over several years to be able to safely sustain and generate the forces required in gymnastics.

Physical Ability Testing Program (men)

Flexibility

1. Forward-backward splits

2 Mats 6 cm for square hips, Mats/Blocks to 14 cm

1 point	2	3	4	5	6	7	8	9	10
+ 10 cm	+ 5 cm	0 (flat)	- 2 cm	- 4 cm	- 6 cm	- 8 cm	- 10 cm	- 12 cm	- 14 cm

- Testing Protocol:
- Heights above flat splits are estimated.
 - Over-splits are measured with gymnast flat on floor and then the height of the mats/blocks is measured. Do not measure under the gymnast.
 - The final position without hand support must be held 2 sec. The measurements are in centimeters.
 - The result is the average of the left and right leg. Slight hip turn is acceptable for men.

2. Side splits

Mats/Blocks to 12 cm

1 point	2	3	4	5	6	7	8	9	10
+ 15 cm	+ 10 cm	+ 5 cm	0 (flat)	- 2 cm	- 4 cm	- 6 cm	- 8 cm	- 10 cm	- 12 cm

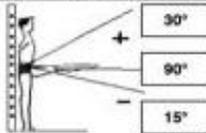

- Testing Protocol:
- Heights above flat splits are estimated.
 - Over-splits are measured with gymnast flat on floor and then the height of the mats/blocks is measured. Do not measure under the gymnast.
 - The final position without hand support must be held 2 sec. The measurements are in centimeters.
 - The result is the average of the left and right leg. Legs should be in a straight line.

3. Leg raise forward – left and right

Wallbar, instrument or chart for measuring angles

1 point	2	3	4	5	6	7	8	9	10
- 15°	- 10°	- 5°	0 (90°)	+ 5°	+ 10°	+ 15°	+ 20°	+ 25°	+ 30°

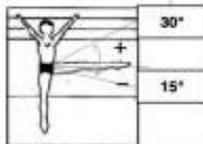

- Testing Protocol:
- Stand with straight back and leg against a wall or wallbar or beam, etc.
 - The angle above or below horizontal is measured in degrees, 90° = 4 points. Must hold 2 seconds.
 - The result is the average of the left and right leg.

4. Leg raise sideways – left and right

Wallbar, instrument or chart for measuring angles

1 point	2	3	4	5	6	7	8	9	10
- 15°	- 10°	- 5°	0 (90°)	+ 5°	+ 10°	+ 15°	+ 20°	+ 25°	+ 30°

- Testing Protocol:
- The gymnast hangs from a wallbar with the body kept vertical
 - The angle above or below horizontal is measured in degrees, 90° = 4 points. Must hold 2 seconds.
 - The result is the average of the left and right leg.

5. Bridge

1 point	2	3	4	5	6	7	8	9	10
poor			satisfactory			good			perfect

- Testing Protocol:
- Quality evaluation** – straight arms, straight legs, flexibility in shoulder rather than lumbar spine. Must hold for 5 seconds. The score is reduced for: bent arms, bent legs, legs apart, deep lumbar flexibility, head up, bent shoulder angle.

6. Trunk bend forwards

Bench, staff, tape-measure

1 point	2	3	4	5	6	7	8	9	10
0 cm	- 2 cm	- 3 cm	- 4 cm	- 5 cm	- 6 cm	- 8 cm	- 10 cm	- 12 cm	- 14 cm

- Testing Protocol:
- Hold staff with firm grip (hands closed) and shoulder width apart. Legs straight.
 - Result is the distance from the top of the bench to the top of the staff.
 - The measurements are in centimeters. Must hold for 2 seconds.

7. Trunk bend forwards in straddle sit

2 benches, staff, tape-measure

1 point	2	3	4	5	6	7	8	9	10
+ 8 cm	+ 6 cm	+ 4 cm	+ 2 cm	0	- 2 cm	- 4 cm	- 6 cm	- 8 cm	- 10 cm

- Testing Protocol:
- Hold staff with firm grip (hands closed) and shoulder width apart. Legs straight. The trunk-arm line must be straight (no shoulder angle).
 - Benches are set at 90° angle to each other. Gymnast sits as in diagram.
 - The measurements are in centimeters and are made from the breastbone (sternum) to the floor. The height of the bench is subtracted. Example: with a 30cm bench and a measurement of 24cm; the performance score is (24-30) -6cm = 8 points

8. Arm-trunk angle backwards

Bench, staff, tape-measure

1 point	2	3	4	5	6	7	8	9	10
+ 23 cm	+ 21 cm	+ 19 cm	+ 17 cm	+ 15 cm	+ 13 cm	+ 11 cm	+ 9 cm	+ 7 cm	+ 5 cm

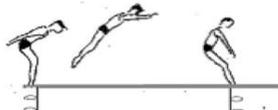

- Testing Protocol:
- The gymnast sits on a bench as illustrated
 - Staff is held firmly in overgrip; shoulder width plus one-hand width apart
 - The final position must be held 5 sec.
 - The distance from the top of the bench to the arm tip is measured in centimeters

Strength, power & endurance

1. Standing long jump

Tape measure

1 point	2	3	4	5	6	7	8	9	10
Reach Height	RH +5 cm	RH +10 cm	RH +15 cm	RH +20 cm	RH +25 cm	RH + 30 cm	RH + 35 cm	RH + 40 cm	RH + 45 cm

Testing Protocol:

- Measure the standing reach height (RH) of the gymnast with arms and hands fully extended overhead. This can be best measured with the gymnast lying on the floor (ankles flexed) and measure from heel to finger tips.
- Measure the length of the jump to the body part nearest to the take-off line (including fall or step backward).

2. Rope climb

Rope with a 1-metre mark and 5-metre mark, stop-watch

1 point	2	3	4	5	6	7	8	9	10
	22 sec	20 sec	18 sec	16 sec	14 sec	12 sec	10 sec	8 sec	6 sec

Testing Protocol:

- For 1 point, climb from stand, with hands at head height. Can use feet. Climb to touch the 5-metre mark.
- For 2 points or higher, the gymnast sits in straddle position on a mat and with hands at the 1-metre mark.
- The climb is performed with feet in straddle L-position throughout. The gymnast climbs as fast as possible to touch the 5-metre mark with one hand. If the feet lower more than 30 degrees below horizontal, the climb does not count.
- The time from the moment the gymnast begins until the touch of the 5-metre mark is measured.

3. Sprint 20 metres

1 P.	2	3	4	5	6	7	8	9	10
4.3 sec	4.2 sec	4.1 sec	4.0 sec	3.9 sec	3.8 sec	3.7 sec	3.6 sec	3.5 sec	3.4 sec
4.0 sec	3.9 sec	3.7 sec	3.6 sec	3.5 sec	3.4 sec	3.3 sec	3.2 sec	3.1 sec	3.0 sec

Testing Protocol:

- 20-metre sprint, the measurement is made in seconds. Ideally two timers are used and averaged.
- 1st line is for gymnasts up to age 13 years
- 2nd line is for gymnasts aged 14 to 17 years

4. Double leg circles

Mushroom, floor level horse without pommels

1 point	2	3	4	5	6	7	8	9	10
n = 5	10	20	30	n = 5	10	15	20	25	30

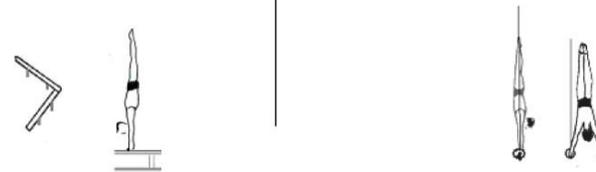

Testing Protocol:

- Number of circles are counted. Execution must have minimum quality value of 3.0 to count. As soon as a circle is performed below quality value 3.0, the counting is stopped and that last circle is not counted.

5. Handstand on Rings

Two parallel bars at 90° or angled bars 90°, rings, stop watch

1 point	2	3	4	5	6	7	8	9	10
5 sec	10 sec	20 sec	30 sec	5 sec	10 sec	15 sec	20 sec	25 sec'	30 sec

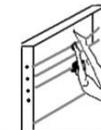

Testing Protocol:

- For scores from 1 point to 4 points, floor or low level bars are used placed at a 90° angle to each other.
- For scores 5-points and higher, rings are used. The rings must be held parallel.
- In each case the quality value must remain at 3.0 or higher. Timing stops when the quality is lower.

6. Hanging leg lifts

1 point	2	3	4	5	6	7	8	9	10
n = 5x	6x	7x	8x	9x	10x	11x	12x	13x	14x

Testing Protocol:

- Hang on wall bar and begin in L-hang position (legs horizontal)
- Lift with straight legs and toes to touch the bar and lower back to L-hang position
- The number of repetitions is measured – no time limit
- In each case the quality value must remain at 3.0 or higher. Counting stops when the quality is lower.

7. V-sit or Manna on Parallel Bars

1 point	2	3	4	5	6	7	8	9	10
2 sec	4 sec	6 sec	8 sec	10 sec	1x 2 sec	2x 2 sec	3x 2 sec	4x 2 sec	5x 2 sec

Testing Protocol:

- For the V-sit the gymnast must lift his legs to a minimum vertical position
- For the Manna, the gymnast can lift quickly or swing to the position. A perfect position for the Manna is with legs horizontal, but for this test, the back at minimum horizontal is sufficient.
- In each case the quality value must remain at 3.0 or higher. Timing stops when the quality is lower.

8. Support lever (planche) on Parallel Bars

1 point	2	3	4	5	6	7	8	9	10
2 sec	4 sec	6 sec	8 sec	4 sec	6 sec	8 sec	2 sec	4 sec	6 sec

Testing Protocol:

- For each of the planche positions, the back must be perfectly horizontal and the arms straight.
- In each case the quality value must remain at 3.0 or higher. Timing stops when the quality is lower.

9. Press to handstand on Parallel Bars

1 point	2	3	4	5	6	7	8	9	10
Swiss press = 1 pt each			Viennese press = 2 pts each			Press bent arms = 3 pts each		Planche press = 5 pts each	
Testing Protocol: <ul style="list-style-type: none"> The goal is for the gymnast to do a sequence of press handstands to maximize his score. For example 10 Swiss handstands = 10 points; 2 planche press = 10 points; 1 planche press and 5 Swiss handstands = 10 points. Each L-sit and each handstand must be held for 2 seconds. In each case the quality value must remain at 3.0 or higher. Counting stops when the quality is lower. 									

10. Pull to support (Muscle-up) on Rings and press handstand

1 point	2	3	4	5	6	7	8	9	10
1x	3x	5x	1x	3x	5x	1x +1x Hdst A	2x +2x Hdst A	1x +1x Hdst B	2x +2x Hdst B
Testing Protocol: <ul style="list-style-type: none"> 1-3 points: Stationary uprise – parallel bars 4-6 - points: Muscle-up to L-sit (2 sec) on rings 7-10 points: Muscle-up through momentary but perfect L-sit position and press to handstand. For example: 7-points is for 1 muscle-up and A-part press to handstand; 8 points is for 2 muscle-ups and 2 A-part press to handstands; 9 and 10 points are for muscle ups and B-part press to handstands. Each handstand must be held for a minimum of 2 seconds. In each case the quality value must remain at 3.0 or higher. Counting stops when the quality is lower. 									

11. Dips and Handstand push-ups on Parallel Bars

1 point	2	3	4	5	6	7	8	9	10
5x	10x	15x	20x	1x	2x	3x	4x	5x	6x
Testing Protocol: <ul style="list-style-type: none"> For dips and for handstand push-ups, the coach puts his closed fist on the bar below the gymnast's shoulder. Each dip and handstand push-up must lower sufficiently to touch the hand. The body stays straight. In each case the quality value must remain at 3.0 or higher. Timing stops when the quality is lower.

Purpose of the Technical Ability Development and Testing Program (TAT) – (Technical Ability Testing)

- The education lines / education structures shown in the TAT and the visible systematic increase of the level of difficulty, should contribute to help gymnasts systematically build up technical performance prerequisites in order to successfully master exercises with a higher difficulty in more advanced learning ages.
- It is a program that creates technical prerequisites and should be a control instrument at the same time.
- The sequence of education / structures illustrates a road from «simple» to «difficult» and is essentially «open-ended».
- A gymnast should advance to the next element only if the preceding Difficulty Level has been learned with a minimum Quality Value of 3.0.
- The information below is a result of many years of experience in educating top-level gymnasts, but also gymnasts from nations with little experience at the time, and it should serve as a guideline.
- Regarding vault: the authors are of the opinion that the variations of Kasamatsu/Tsukahara vaults should not be recognised as basic structures. The basis for this vault group is the handspring forward and salto forward stretched. A high level of control of this forward oriented structure has an exceptional positive effect on the learning of future vault structures.

Evaluation and Control System for Technical Ability Testing (TAT)

- At **TAT** control competitions or testing sessions, the gymnast has the possibility to choose a value or Difficulty Level from the listed skill sequences based on his existing performance level.
- For lower ages, this element may be executed two times, the best attempt is counted. For higher level gymnasts, the execution should be limited to one attempt.
- The result is calculated by selecting the Value Level of the skill sequence (for example: Difficulty Level = DL 5) and this is multiplied with the Quality Value given by the coach or judge or evaluator (for example: Quality Value = QV 3). **EXAMPLE: DL=5 x QV=3 = 15 Points**

Information for the Selection of Difficulty Levels (DL)

Difficulty Level

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

 = **Limit**

 = **Possibility for attempting a higher Difficulty Level.**

(When all preceding elements have been accomplished with a minimum Quality Value of 3.0)

Assessment of the Quality Value (QV)

The evaluation of the technical performance quality = Quality Value is given in increments from 0 – 4 points. For a finer discrimination of quality with this evaluation system, half-point increments can be given (for example 1.5; 2.5; etc.)

- 0** = Not accomplished. Intended element not recognisable.
- 1** = Intended element barely recognisable. Bad technical performance, incorrect body position (posture) or fall.
- 2** = The essential technical characteristics have been accomplished. Poor technique and execution, step or hop.
- 3** = The element is shown with good technique and execution; it is controlled. It could be integrated in a competition exercise.
- 4** = The element is shown with very good technique and execution. No landing errors.

- Elements of Quality Value = 3 can be included in domestic competitions and demonstrate that the gymnast is ready to compete with the compulsory or optional exercises that contain that element.
- Only elements of Quality Value = 4 should be included in international competitions.
- This philosophy and concept applies also to elements not in the Technical Testing Charts – for example all elements in the Skill Acquisition Profile Charts presented at the end of this book and any elements not within the scope of this book.

Requirements for Methodical Apparatus (Auxiliary Equipment)

- For a successful execution of the education programs, a high degree of discipline, cleanliness and safety in the training halls is necessary.
- The availability of quality equipment, mats, landing pits etc. have a high influence on a goal orientated and systematic education.
- The availability of methodical equipment is of significant importance.
- The requirements for methodical apparatus (auxiliary equipment) are listed and detailed with the test exercises.
- They promote a goal-oriented methodical progress of training and are partially also measuring instruments.
- Most apparatus manufacturers offer such equipment.
- In some cases, such apparatus can be or will have to be the produced by the coach.
- The practical use of such methodical pedagogical equipment is clearly and extensively shown in a FIG distributed DVD by Dieter Hofmann.

2	<p>3x backward swing as in Value Level 1 (shoulders at ring level)</p>	 <p>3x</p>	7	<p>Handstand – giant forward through handstand</p>	
3	<p>3x backward swing as in Value Level 2 (shoulders: level with top of the rings)</p>	 <p>3x</p>	8	<p>Handstand – inlocate and uprise bwd to handstand (2 sec)</p>	
4	<p>Inverted hang – backward swing and inlocate into hang</p>		9	<p>Handstand – 2x giant fwd to handstand(2 sec)</p>	 <p>2x</p>
5	<p>Backward swing – 2x inlocate (shoulders at ring height)</p>	 <p>2x</p>	10	<p>Handstand – 3x giant fwd to handstand (2 sec)</p>	 <p>3x</p>

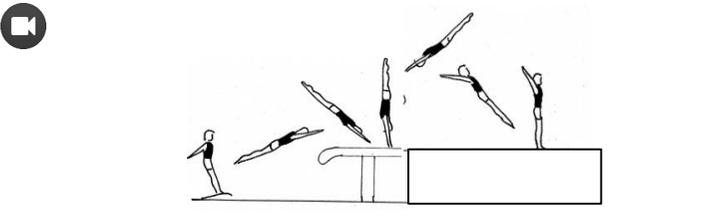

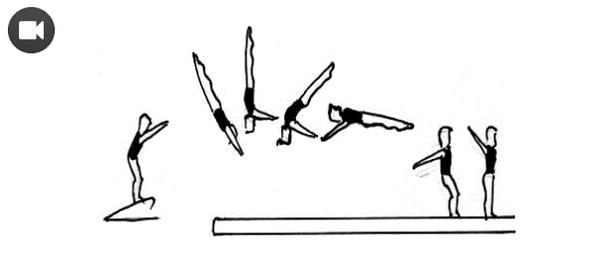

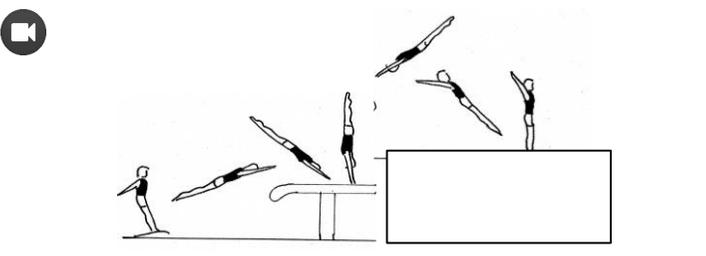

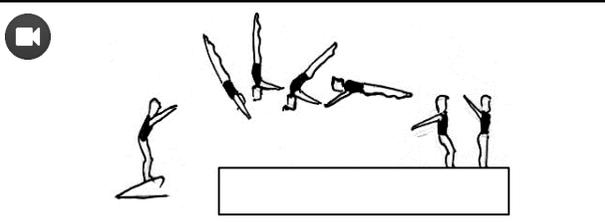

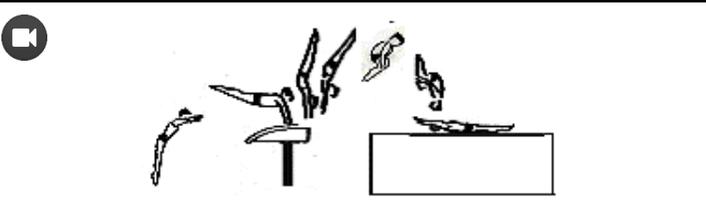

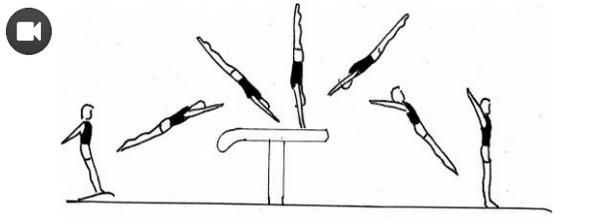

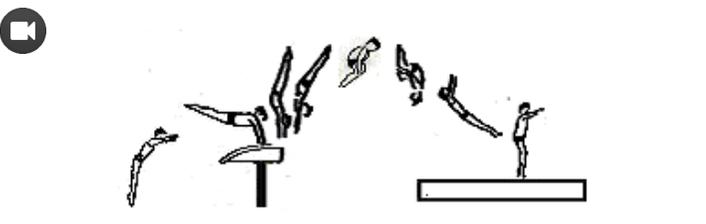

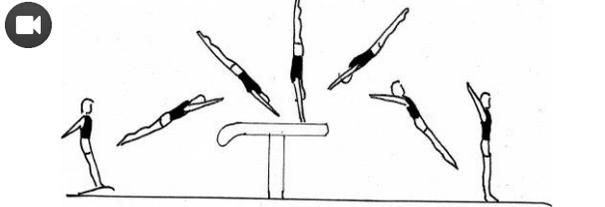

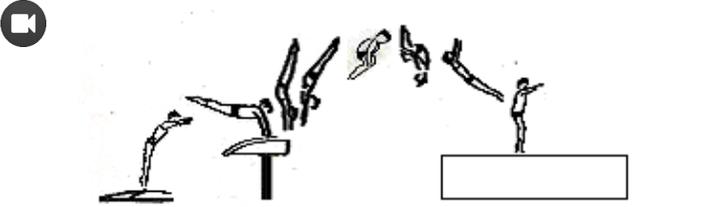

RINGS - Structure 3 – Kips and Felges

1	<p>Hang 1x pull to support</p>	 <p>1x</p>	6	<p>Inverted hang and kip to L-sit (2 sec)</p>	
2	<p>Hang and 3x pull to support</p>	 <p>3x</p>	7	<p>Inverted hang and kip to L-sit (2 sec) – press handstand (bent arms / hips) (2 sec)</p>	
3	<p>Stand – felge bwd to support</p>		8	<p>Kip to L-sit (2 sec) – press handstand with straight arms and straddled legs (2 sec)</p>	
4	<p>Support – felge bwd piked into support</p>		9	<p>Handstand – lower – felge bwd 30° to L-sit (2 sec) – press handstand with straight arms and straddled legs (2 sec)</p>	
5	<p>Hang – pull to L-sit – felge fwd piked to support - press to handstand (bent arms / hips) – 2 sec.</p>		10	<p>Kip to L-sit (2 sec) Swiss handstand (2 sec) – felge bwd to L-sit (2 sec) – Swiss handstand (2 sec)</p>	

RINGS - Structure 4 - Dismounts

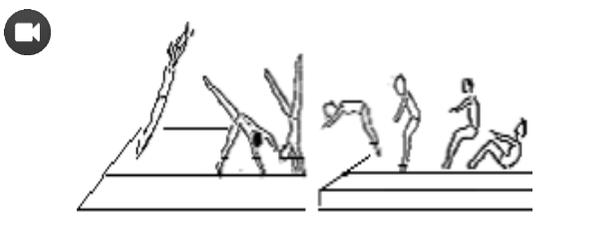

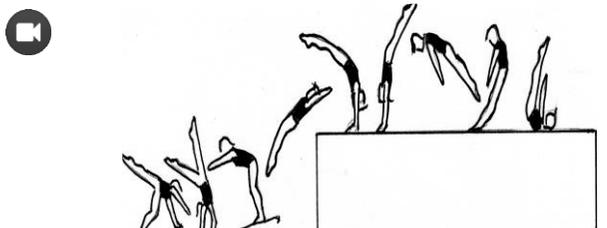

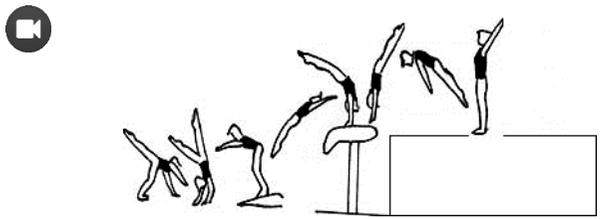

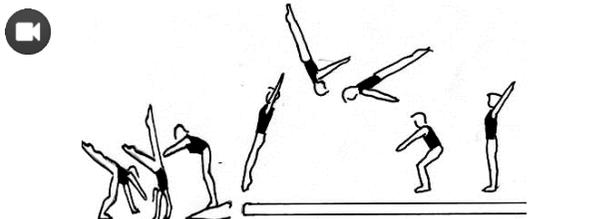

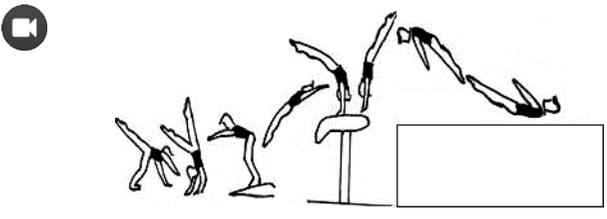

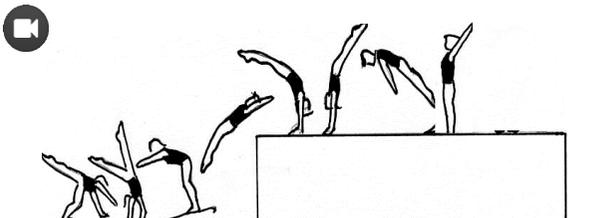

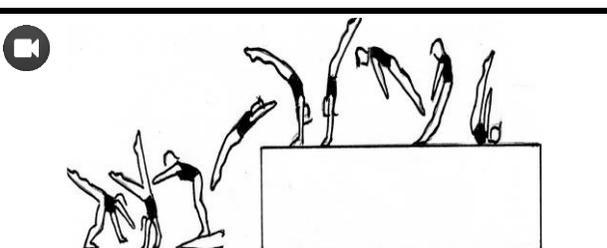

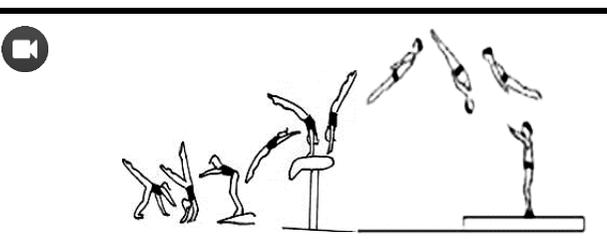

1	Not required		6	Felge through support position and salto bwd tucked	
2	Not required		7	Felge through support position and salto bwd stretched	
2	Not required		8	Dislocate and double salto bwd tucked	
4	Backward swing – forward swing – dislocate stretched and salto bwd stretched to stand		9	Not required	
5	Forward swing – backward swing – inlocate stretched and salto fwd stretched to stand	 <p style="text-align: center;">Salto fwd. stretched</p>	10	Handstand – dislocate and double salto bwd stretched or Handstand – inlocate and double salto fwd tucked	

VAULT – Structure 1 – Handspring forward

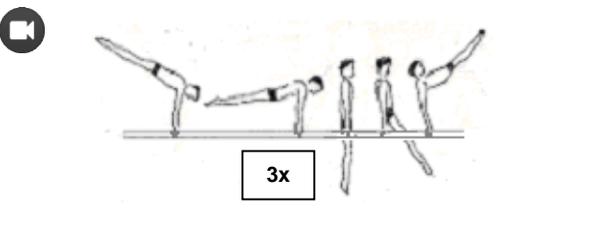

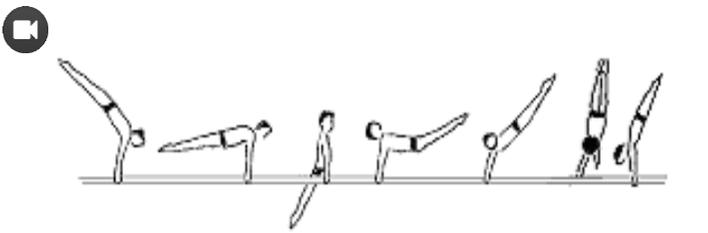

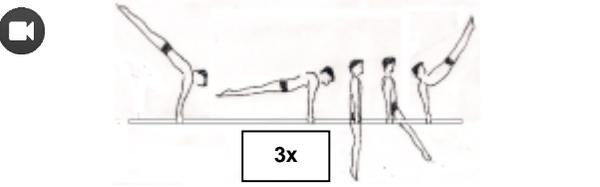

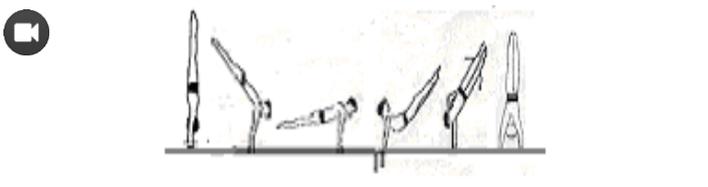

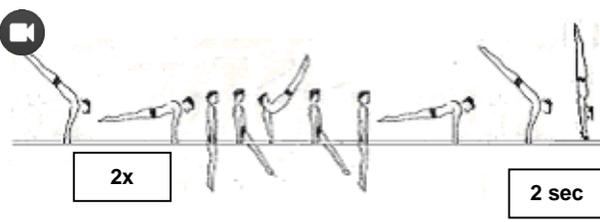

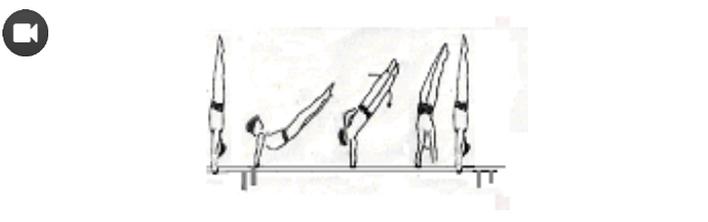

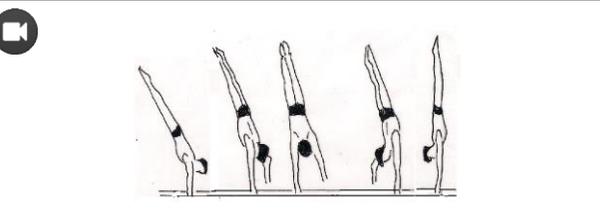

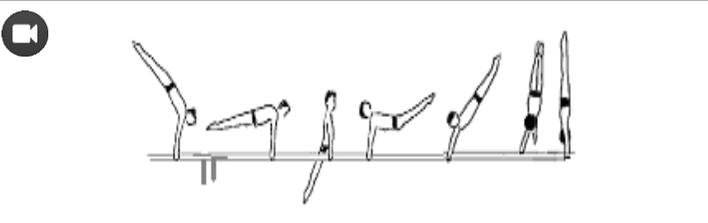

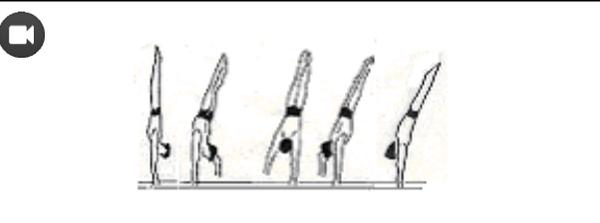

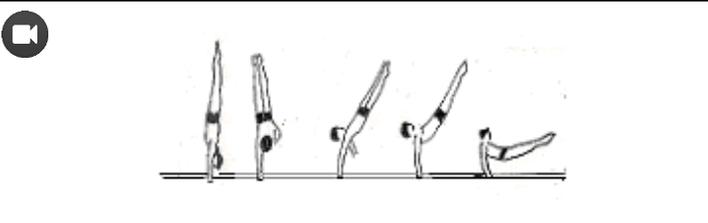

1	<p>Short run and salto fwd tucked from board</p>		6	<p>Handspring onto mats at table height (135cm)</p>	
2	<p>Short run and salto fwd straight</p>		7	<p>Handspring onto mats 60cm above table height (195 cm)</p>	
3	<p>Short run and salto fwd straight (onto 60cm mat)</p>		8	<p>Handspring and salto fwd to land on back – mats at table height (135cm)</p>	
4	<p>Handspring over table (100-110cm) – normal mats</p>		9	<p>Handspring and salto fwd to land on normal mats</p>	
5	<p>Handspring over table (125cm) – normal mats</p>		10	<p>Handspring and salto fwd to land on mats 80cm</p>	

VAULT – Structure 2 – Round off entry (Yurchenko)

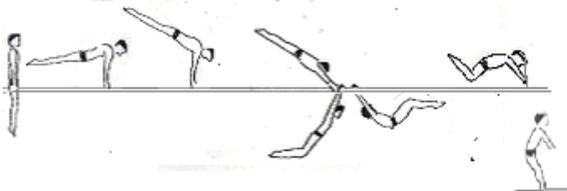

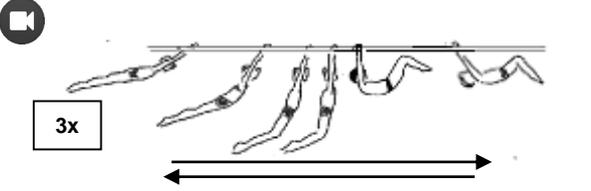

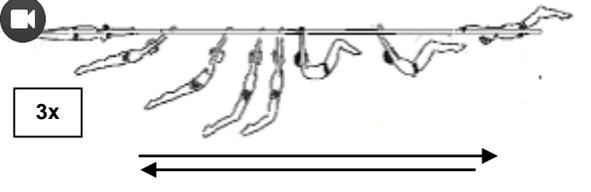

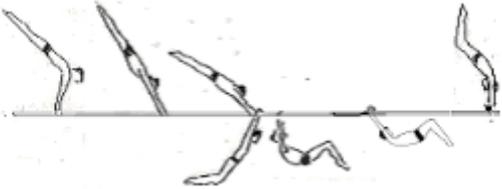

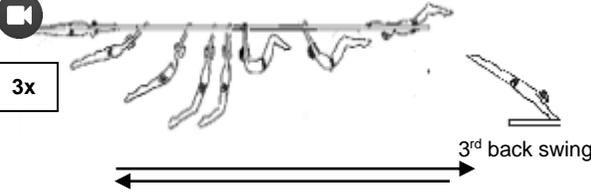

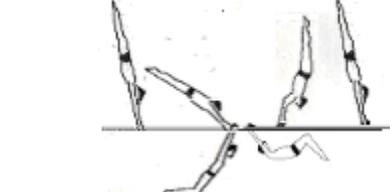

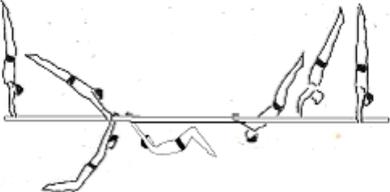

(Yurchenko safety mat required)

1	<p>From stand, hurdle and round off onto 20cm mat – no deviation from centre line</p>		6	<p>Round off back handspring over rotate onto back with feet just touching (Mats 120 cm)</p>	
2	<p>Round off to board and jump backward to land on back (Mats 100 cm)</p>		7	<p>Round off handspring backward over horse to land on high mats (Mats at table height = 125-135cm)</p>	
3	<p>Round off to board and salto backward straight</p>		8	<p>Round off handspring backward over horse to land on back (Mats at table height = 125-135cm)</p>	
4	<p>Round off to board and handspring backward onto high mat (Mats 80 cm)</p>		9	<p>Yurchenko tucked</p>	
5	<p>Round off back handspring over rotate onto back with feet just touching (Mats 80 cm)</p>		10	<p>Yurchenko straight</p>	

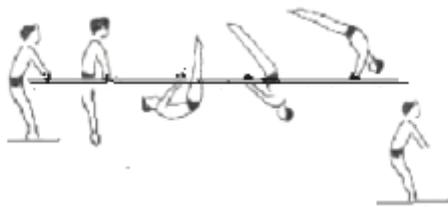

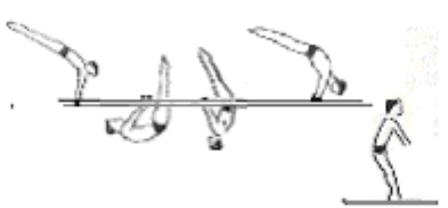

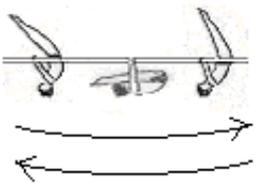

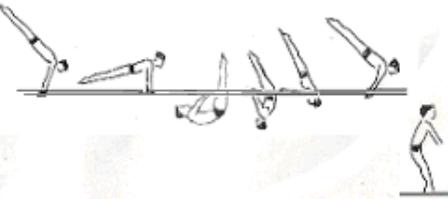

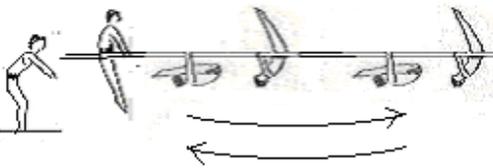

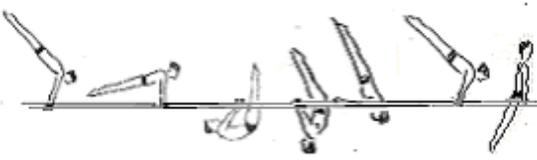

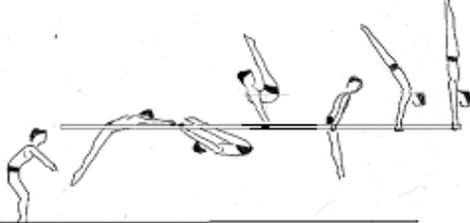

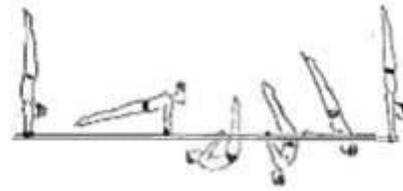

PARALLEL BARS – Structure 1 – Swing through support

1	<p>3x swings forward and backward - 30°</p>		6	<p>Swing forward and backward - on forward swing Stützkehre 60°</p>	
2	<p>3x swings forward and backward - 45°</p>		7	<p>3/4 Diamidov to 1 bar</p>	
3	<p>2x swings forward and backward to handstand (2 sec)</p>		8	<p>From handstand, Diamidov</p>

5	<p>Swing to handstand and 1/2 turn backward to handstand</p>		10	<p>Swing through handstand and Healy to support</p>	

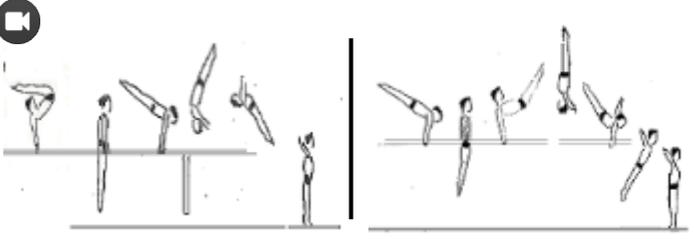

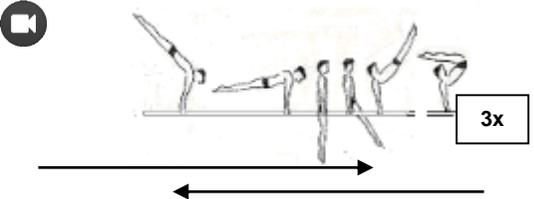

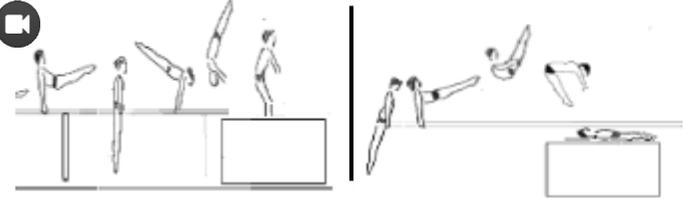

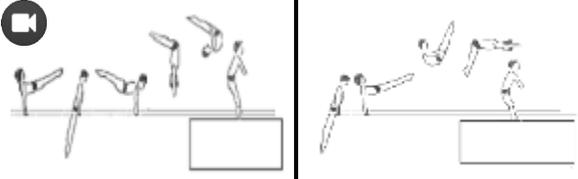

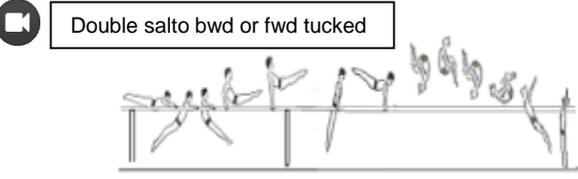

PARALLEL BARS – Structure 2 – Long hang swing

1	Not required		6	Backswing to 45° - Layaway to giant swing tucked 45° to stand (spotted by coach)	
2	3x swing forward and backward in hang		7	Not required	
3	3x swing forward and backward in hang (body at bar height)		8	Backswing near handstand - Layaway to giant swing tucked to stand (el-grip; spotted by coach)	
4	3x swing forward and backward in hang (third back swing above bars)		9	Backswing near handstand - Layaway to giant swing to handstand in elgrip – jump down to stand (spotted by coach)	
5	Not required		10	From handstand, giant swing to handstand (Kenmotsu)	

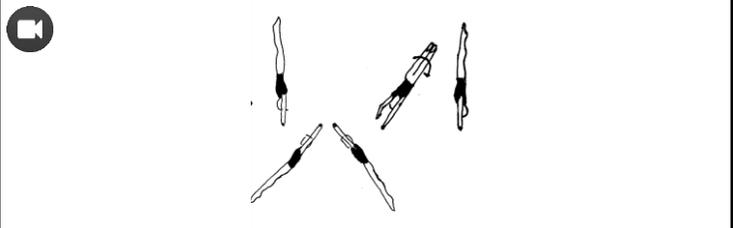

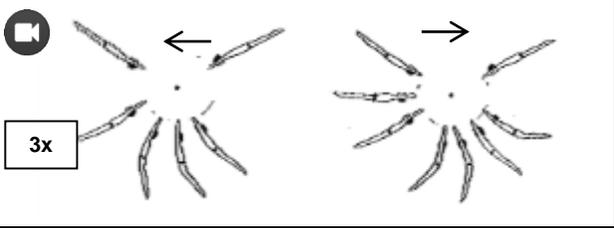

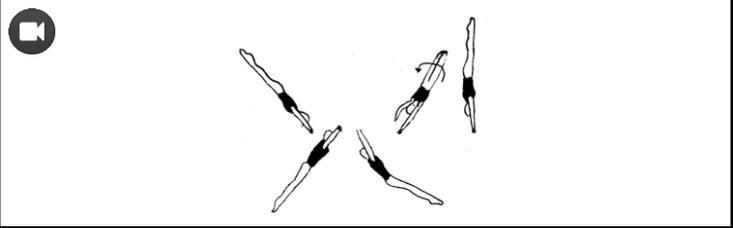

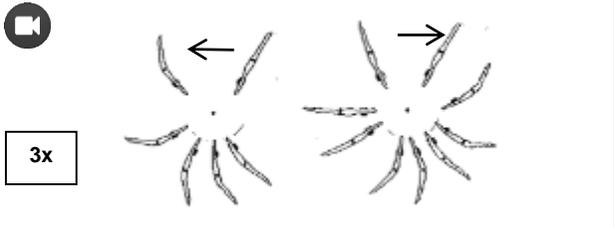

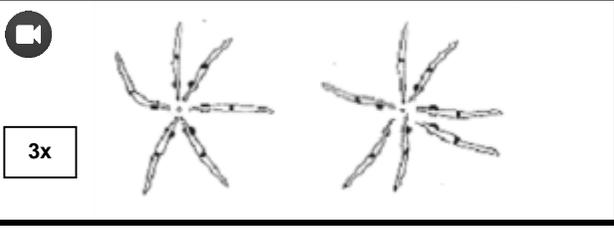

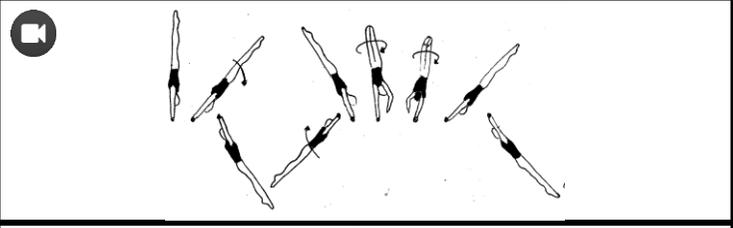

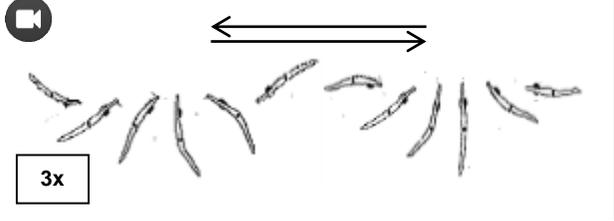

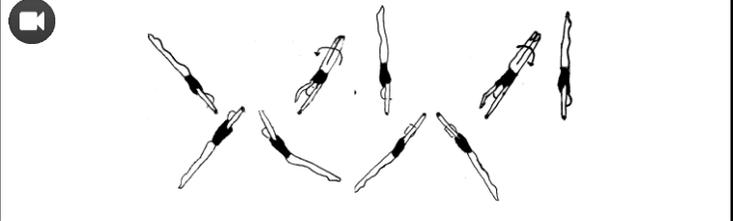

PARALLEL BARS – Structure 3 – Felges

1	Not required		6	Stand – jump to Felge backwards to el-grip support, jump down	
2	Not required		7	From back swing 30°, Felge backwards to el-grip support 30°, jump down	
3	3x swing in piked inverted hang		8	From back swing 45°, Felge backwards to el-grip support 45°, jump down	
4	Stand – jump to 3x swing in piked inverted hang		9	From back swing, Felge backwards to support 60°	
5	Stand – jump to glide kip to near handstand		10	From handstand, Felge backwards to handstand	

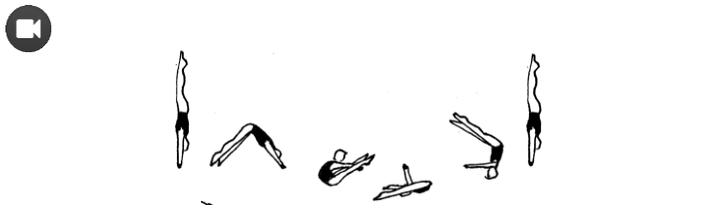

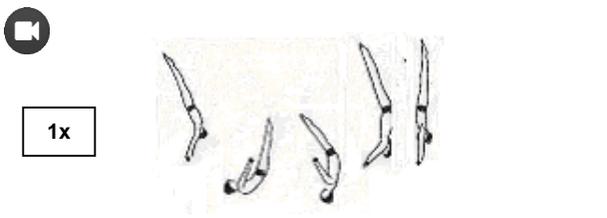

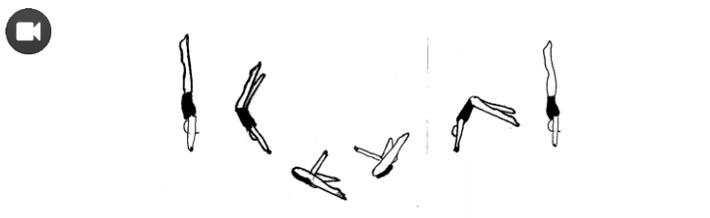

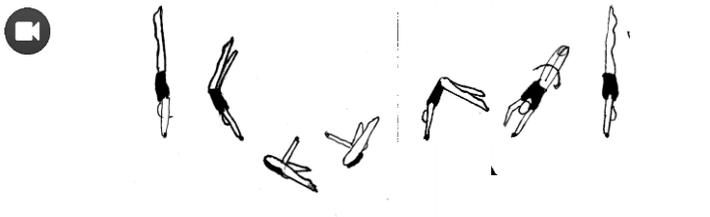

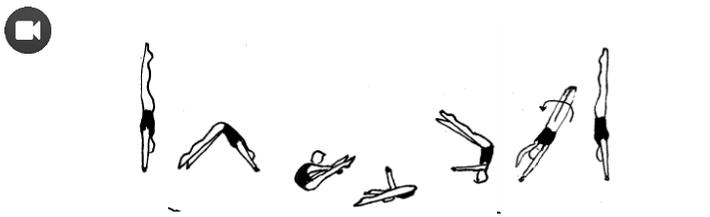

PARALLEL BARS – Structure 4 - Dismounts

1	Not required		6	Salto forward stretched to stand OR Salto backward stretched	
2	Not required		7	Not required	
3	3x forward and backward swing through high V-sit (Manna)		8	Salto forward stretched OR Salto backward piked to land on the back (mat at bar height)	
4	Not required		9	Not required	
5	Salto forward piked OR Salto backward piked to stand on mats at bar height (low bars)		10	Double salto forward tucked OR From handstand, double salto backward tucked	

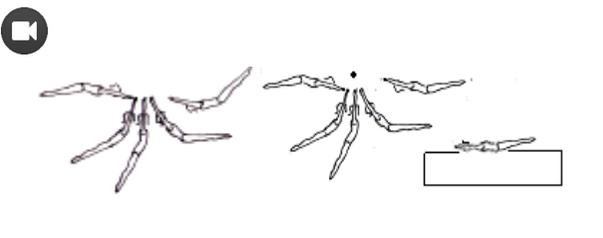

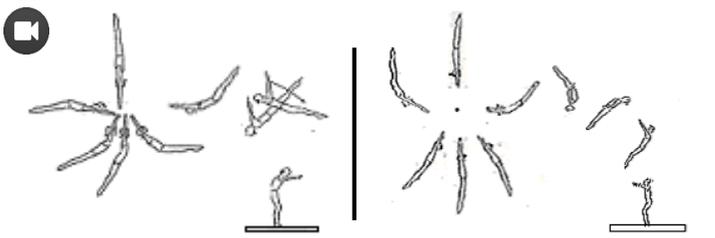

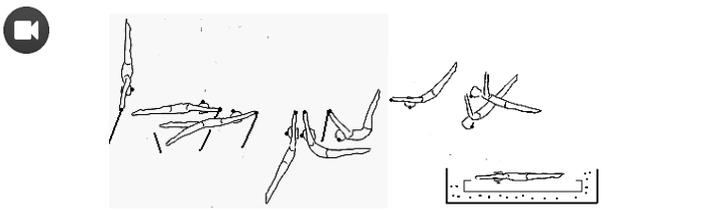

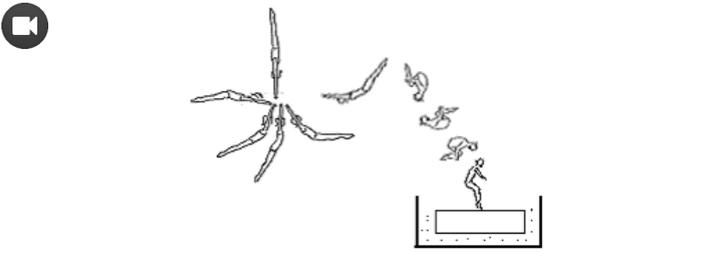

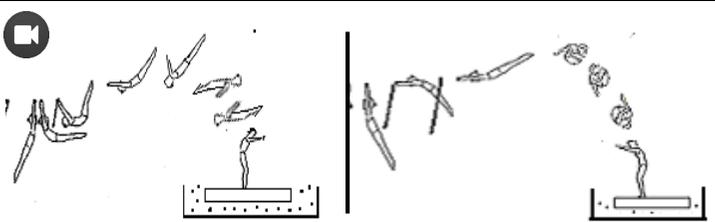

HORIZONTAL BAR – Structure 1 – Long hang swings

1	<p>3x forward and backward swings (body horizontal) (straps)</p>		6	<p>Under grip giant swing with ½ turn to overgrip</p>	
2	<p>3x forward and backward swings (body height 30°) (straps)</p>		7	<p>Overgrip giant swing with ½ turn to undergrip</p>	
3	<p>3x forward and backward swings (body height 60°) (straps)</p>		8	<p>2x accelerator giants backward (straps)</p>	
4	<p>3x giant swings forward and backward (straps)</p>		9	<p>Under grip giant swing with 1/1 turn to mixed grip (under grip and el-grip)</p>	
5	<p>3x forward and backward swings with pronounced wave movements through the bottom vertical (straps)</p>		10	<p>Overgrip giant swing with ½ turn to undergrip and Under grip giant swing with ½ turn to overgrip</p>	

HORIZONTAL BAR – Structure 2 – In-bar elements (elements near the bar)

1	<p>1x free hip circle 60° (straps)</p>		6	<p>From giant swing. Stalder to handstand</p>	
2	<p>1x free hip circle to handstand (straps)</p>	<p>1x</p> 	7	<p>From giant swing. Endo to handstand</p>	
3	<p>From handstand 3x free hip circle to handstand (straps)</p>	<p>3x</p> 	8	<p>Endo with ½ turn to handstand</p>	
4	<p>3x straddled circle 45° (Stalder) (straps)</p>		9	<p>Stalder with ½ turn to handstand</p>	
5	<p>3x straddled circle (Endo circle) (straps) 45°</p>		10	<p>Endo 1/1 turn to mixed grip (undergrip and el-grip)</p>	

HORIZONTAL BAR – Structure 3 - Dismounts

1	Not required		6	<p>From handstand and salto forward tucked</p>	
2	<p>2X forward and backward swing – on 2nd forward swing land on back on 40cm mat (Recommended to use a wedge mat or a sloped mat)</p>		7	<p>Giant swing bwd and salto bwd straight OR Giant swing fwd and salto fwd stretched</p>	
3	<p>2X forward and backward swing – on 2nd forward swing salto backward tucked</p>		8	<p>Giant swing bwd and 1 ½ salto bwd straight to land on back on mat in pit</p>	
4	<p>2X forward and backward swing – on 2nd forward swing salto backward stretched</p>		9	<p>Giant swing backward and double salto backward tucked into foam pit (no mat)</p>	
5	Not required		10	<p>Giant swing bwd and double salto bwd straight onto mat in pit OR Giant swing fwd and double salto fwd tucked onto mat in pit</p>	

SKILL ACQUISITION PROFILES

for

Men's Artistic Gymnastics

This is a recommended profile of skill acquisition by gymnasts for all apparatus. 1/4 designates initiation of the learning of the element. 4/4 designates perfection. No element should be included in a competition exercise that has not reached the level of 3/4.

Skill Acquisition Charts and Competition recommendation

The charts that follow present a variety of recommendations from an analysis of the world's best knowledge and best practice.

1. The SKILL ACQUISITION PROFILE CHARTS for each MAG and WAG apparatus show the normal progression of the main gymnastics skills. 1/4 designates the age when a skill should be initiated; 4/4 when it is perfected (see chart below). No skill should be used in competition until it is at the advanced 3/4 level for domestic competition and the 4/4 level for international competition. There may be individual differences in the rate of skill acquisition, but these examples are the world norm and have been verified also by the FIG men's and women's technical committees.
2. The SAMPLE AGE GROUP COMPETITION STRUCTURE on the last page shows clearly that international competitions are not appropriate for boys under age 12 and girls under age 11. Additional information is presented that can serve as guidelines for federations.

LEVEL of LEARNING	STAGE	CONDITIONS	DESCRIPTION	APPLICABILITY
0	UNKNOWN	SUFFICIENT KNOWLEDGE AND SKILLS	The coach has to assess and evaluate the physical, technical and methodological resources crucial for approaching the element / connection / combination	STRATEGICAL TACTICAL DECISIONS
1/8	INITIATING		The gymnast has to realize the mental and kinesthetic representation of the main moments, phases and actions typical for the element.	TRAINING ONLY
1/4	LEARNING	IN PHASES	The gymnast has to prove the correctness of the positions, shapes, typical motor actions or gathered into motor mechanisms .	
2/4		WITH TRAINING ASSISTANCE	(Coach support, foam pit, loops, elastic surfaces, other devices) The gymnast has to prove the correctness of the typical biomechanical mechanisms using not more than 2 of the specified support procedures	
2/3		ALONE (WITHOUT SUPPORT)	The gymnast has to prove the correctness of the typical biomechanical mechanisms without using any of the specified support procedures. SECURE but INCONSISTENT	
3/4	COMPETENT	WITHOUT CONNECTIONS OR COMBINATIONS	The gymnast can perform the element without major penalties, SECURE and CONSISTENT , but without any connections or combinations, before or after	ROUTINE READINESS AVERAGE
4/4	PERFECTED	COMPETITIVE	The gymnast can perform the element without major penalties, SECURE IN ANY CONNECTION or COMBINATION	ROUTINE READINESS HIGH
